

HEALTHCARE, PHARMACEUTICALS & LIFE SCIENCES

Our clients come to us because **we have one of the most integrated and comprehensive life sciences practices in the CEE/SEE region**, offering legal and strategic business advice to the largest and most innovative life sciences companies.

Due to our specialised expertise in different legal areas of the life sciences industry, our lawyers understand the unique economic, regulatory, market and political climates facing you across the region.

You can rely on our deep bench of talent in virtually every discipline and our knowledge of local and regional government agencies. This means that whether you are a public or a private life science company, **we can provide a full range of legal services at all stages of your development; from start-up and emerging growth companies to mature international and public companies.**
